

Display Sales Order Number on Purchase Orders

This enhancement displays the Sales Order number on purchase orders.

How it works:

1. Launch Software for Hardware and open the purchase order you wish to view. For this new enhancement to work you must view a PO that has been generated from within the Sales Order module.
2. Select *Bulk* or *Itemized* from either the *Preview Report* or *Print Report* menu selections across the top of the purchase order form.
