## **Installation Labor Pricing**

In an effort to optimize the Installation Labor Pricing saving process we have made some changes to the module. You are now able to save by a single product type, such as doors, or save all product types pricing at once. We have also optimized the form where you assign tag numbers.

## How it works:

- 1. Launch Software for Hardware.
- 2. Open a Contract Job where installation labor is included.
- 3. Click Pricing.
- 4. Choose Installation Labor.
- 5. The followings screen appears.

🆓 Installation Pricing		– 🗆 ×
Installation Status Create Invoice Preview Invoice		
Modify Save V Install Doors	User Defined Installation Category	Price of the User Defined Category
Modify Save V Install Frames		
Install Hardware		
Install Pre-hung Units		
Modify Save Install Lites/Louvers/ Glass at the Job Site		
Modify Save Install Misc. Accessories (Div. 10)		Labor Rate
Select Areas	Save All Print Cancel	65
		Markup Percent 25

- 6. We have renamed the Save button to Save All.
  - a. This button works the same as previously in that it prices all the product type assigned to installation labor pricing.
  - b. If pricing large jobs this method will take longer.
- 7. We have inserted a *Save* button next to each product type assigned to installation labor pricing.
  - a. This method is much quicker and can be used if you only need to price or reprice a single product type.
- 8. SFH has also optimized the screen used to assign tag numbers to different product type.
- 9. Just as before you will click any one of the *Modify* buttons to the left of each product type.
- 10. The following form appears:

1 Installatio	n Tag Numbers for I	Doors The list of not beer tag num wi	on the left com n assigned to in bers to/from th thout a Materia	tain nsta ne ci al Ca	s all the Ta II. - 11. On this screen we changed the grid type for greater loading and processing speed.
- 12. Secondly, in the past when working on a large job it might take minutes to save the tag number assignments. Now, by clicking *Save*, on a large job it will quickly save the tag number assignments.
